LUMIERE SKINCARE

'Glow With Confidence' — Multi-Channel Campaign

Client:	Lumiere Skincare Ltd.	Campaign ID:	LUM-2024-003
Industry:	Luxury Skincare & Beauty	Status:	Completed
Duration:	June – September 2024 (14 weeks)	Budget:	\$480,000 USD
Prepared by:	Strategic Planning Division	Confidential:	Yes – Internal Only

Executive Summary

The 'Glow With Confidence' campaign was designed to reposition Lumiere Skincare from a niche dermatologist-recommended brand into a mainstream luxury lifestyle choice targeting millennial and Gen-Z women aged 24–38. The campaign ran across four channels — Instagram, YouTube, programmatic display, and a pop-up experiential activation in Dubai Mall — over 14 weeks.

The campaign exceeded all KPIs, generating a 340% increase in organic social mentions, a 28% uplift in direct website conversions, and an overall ROAS of 4.7x against a total investment of \$480,000. The brand's Net Promoter Score rose by 22 points over the campaign period.

Client Background

Lumiere Skincare was founded in 2017 in Paris and entered the Middle East market in 2020. The brand is positioned in the premium skincare segment with an average product price point of \$95–\$220. Their hero product, the 'Lumiere Radiance Serum', holds a 4.8/5 rating across 12,000+ reviews on their DTC website.

Prior to this campaign, Lumiere relied primarily on dermatologist referrals and word-of-mouth. Brand awareness in the UAE was measured at 31% among the target demographic — significantly below direct competitors L'Oreal Paris (87%), Tatcha (54%), and The Ordinary (72%).

Campaign Strategy & Creative Direction

The overarching creative territory was built around the insight that modern women don't want to be told they need fixing — they want to be celebrated as they are, with skincare as a tool of empowerment rather than correction. The campaign line 'Glow With Confidence' anchored every execution.

Phase 1 — Awareness (Weeks 1–4)

Launched with a hero 60-second brand film directed by a female UAE-based director. The film featured 6 women of different ages, skin tones, and backgrounds in real, unretouched scenarios. Distributed on YouTube (pre-roll and skippable) and Instagram Reels. Paid media budget for this phase: \$180,000.

Phase 2 — Consideration (Weeks 5–10)

Partnership with 12 micro-influencers (50k–200k followers) in the UAE beauty space for a 6-week 'real skin diary' series. Each influencer documented their genuine experience with the Radiance Serum over 4 weeks with no scripted content requirements. Supported by programmatic display targeting skincare enthusiasts and previous website visitors.

Phase 3 — Conversion (Weeks 11–14)

Pop-up experience at Dubai Mall (Gate Avenue, Level 1) ran for 3 weekends. Free skin consultations, personalized serum samples, and a digital 'Glow Profile' quiz with email capture. 4,200 visitors attended; 1,840 email leads captured with a 31% conversion rate to purchase within 30 days.

Key Learnings & Recommendations

Micro-influencer s outperform macro:	Nano/micro-influencers (50k–200k) generated 4.2x higher engagement rates compared to the two macro influencers (500k+) used in Phase 1 testing.
Unretouched creative drives trust:	Ad recall and sentiment scores were 67% higher for the unretouched brand film variants compared to polished product-only executions.
Physical activations amplify digital:	The Dubai Mall pop-up drove a 3.1x spike in branded search during the weekend events, demonstrating strong physical-to-digital attribution.
Email capture is undervalued:	The 1,840 leads captured at the pop-up generated \$570,000 in attributed revenue within 90 days — the highest revenue-per-lead of any channel.
